

PET SNACKS

Extrufood is the specialist in the engineering and manufacturing of extrusion machinery and peripheral equipment for the semi-moist pet snack industry. Extrufood is well-known for its unique multi-color dies, rotary dies and other equipment such as cutting machines, which are being used by pet snack market leaders all over the world.

Nowadays, much of the attention of the pet snack industry is focused on the production of pet treats and semi-moist pet snacks. These pet snacks are trendy products with high quality standards in taste, quality and presentation. Constant innovation is essential, therefore our experience and expertise at Extrufood will simply help you to excel in this market. Our proficiency regarding forming dies is a key factor.

Diemix® and Dies

Extrufood was the first in the market to offer multi-color pet snack production lines with the introduction of the Diemix®. Pet snacks & treats with new shapes, some twisted and even with bright colors, can now be found in supermarkets and specialized pet shops. Our team is specialized in the designing of forming dies for the pet snack industry and provide the best possible service in fields of research and expertise. With our Diemix®, our (co)-extrusion dies and our rotary dies we can provide you with endless possibilities for combinations of colors, shapes and textures, twisted or non-twisted and co-extruded or hollow.

Equipment

The Extrufood pet snack production lines and equipment guarantee the highest level of production efficiency and maximum quality of the final product. Beside the forming dies, Extrufood offers cooking and forming extruders and guillotine cutters to create an efficient pet snack production process in order to meet all the specific and unique requirements of our clients.

All our machines are customized solutions for each client and its products. With only one extruder we can make single products with up to four different colors, combined with different shapes and fillings.
